

## The Royal Crusade

It is 1606, one year since the failed Gunpowder Treason Plot, and the attempted assassination of our good King James I. But evil is afoot, and there are rumors that someone from this very village is preparing to commit treason and murder our King! Everyone is understandably distraught over this fact, and King James doth desire your assistance in discovering and capturing the culprit. At the end of each event or performance, the performers will give you three clues of a suspect, a weapon OR a location which was NOT involved in the plot. When you have eliminated all of the suspects, weapons and locations that were NOT involved you will have one suspect, one weapon and one location remaining – you will have solved the crime!
